

Waterford, Ireland

Jabil in Waterford offers tailored solutions from concept to industrialization for the world's leading pharmaceutical and healthcare customers at its 200,000 sq.ft state of the art facility in Ireland's South East.

Offering world-class capabilities in tooling design, injection molding, quality control and assurance, and manual to high-speed automated assembly, Jabil in Waterford is a trusted partner bringing products to market every day that improve patient lives.

DEVICE DESIGN AND DEVELOPMENT

We scale our design services to meet our customers' needs — from delivering discrete design work packages to managing complete device development projects in mechanical design, connectivity, electronic design, system miniaturization, as well as Design For Molding (DFM) and Design For Assembly (DFA) for large volume manufacturing.

CERTIFICATIONS

GMP Licence • ISO 13485

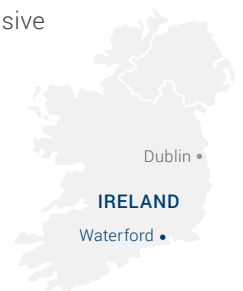

SECTORS SERVED

- Pharmaceutical
- Diagnostics
- Medical Devices
- Consumer Health

STRATEGIC CAPABILITIES

- High Volume Complex Automation
- Development Assembly, Clinical Trial and Integration
- Class 8 Cleanroom
- Drug Handling
- Device Design & Development
- CT Scanning
- Plastic Injection Moulding & Mould Tool Design
- Supply Chain, Inventory & Logistics Management
- Tooling & Ultra Sonic Welding

As Ireland's 5th largest city, Waterford is home to a diverse number of multinational companies, including an impressive concentration of globally recognized franchises from the Life Sciences and Engineering sectors.

Jabil's strategic location in Waterford benefits customers through easy access to graduates and skills from the Southeast Technological University as well as cutting-edge technologies and capabilities such as material testing from the South-East Applied Materials Institute.
