

INTELLIGENT Custom Packaging Solutions with 2-level interaction for greater customer engagement

ACTIVE Devices that provide information or dispense product leveraging technologies

RIGID Core Packaging Technologies including plastics injection, blow mold, thermoform and compression molding

CONSUMER DEVICE Durable precision mechanical/electronic assemblies that improve the delivery, application, and usage of consumables through IoT

SMART PACKAGING. BRAND BRILLIANCE.

WHAT IS JABIL PACKAGING SOLUTIONS?

Jabil Packaging Solutions creates brand brilliance for the world's leading brands through technology leadership, manufacturing excellence and time-to-market advantages. We build high precision solutions that create meaningful, authentic and compelling brand experiences and drive revenue and market share gains for the world's top brands. Jabil's Smart packages are the future of an industry that's seeking game changing differentiation opportunities and speed-to-market gains at times of intense cost cutting and store brand competition.

Jabil Packaging Solutions enables brands to address the requirements of a rapidly changing consumer landscape. A full packaging solutions partner, Jabil Packaging's offering includes:

- Intelligent – Custom packaging solutions with 2-level interaction for greater consumer engagement
- Active – Devices that provide information or dispenses product leveraging technologies
- Rigid – Core packaging technologies including plastics injection, thermoform, blow molding and compression molding.
- Consumer Device -- Durable precision mechanical/electronic assemblies that improve the delivery, application, and usage of consumables such as liquids and paper via IoT.

WHO CHOOSES JABIL PACKAGING SOLUTIONS?

The most well-known consumer brands trust Jabil Packaging Solutions to deliver competitive advantages in smart packaging solutions

- Top consumer brands such as Kraft and Nestle are loyal Jabil Packaging Solutions customers and partners in differentiated packaging innovation
- Customers seeking an end-to-end packaging solutions partner – from design and collaboration to mold and manufacturing
- Companies seeking to diminish costs by near-shoring to more economical manufacturing operations
- Brands that want to increase consumer loyalty through integration of both consumables and smart devices through IoT
- Brands that value partners that drive sustainable solutions with their unique corporate and consumer commitments in mind.

WHY JABIL PACKAGING SOLUTIONS?

Jabil offers a 50+-year history in building innovative solutions for Fortune 500 brands

- Access to Jabil's extended capabilities – from technical expertise to design and innovation collaboration the world over
- End-to-end package development from ideation and engineering to pack out and delivery, with design, digital prototyping and mold development all under one roof
- Diminished vendor reliance, friction and costs through a world-class manufacturing and procurement footprint
- Faster time-to-market, with increased revenue and market share from top to bottom
- Differentiated package development including device to consumable and IoT-integrated intelligent solutions
- Sustainable offerings that support brand commitments to eco-friendly packaging and diminishing carbon footprint emissions

HOW DOES JABIL PACKAGING SOLUTIONS WORK?

- Jabil Packaging Solutions collaborative ideation and innovative design capabilities solve unique challenges and create powerful new opportunities for brand differentiation.
- Jabil Packaging Solutions offers expertise in both traditional rigid plastics and innovative barrier technologies that open new doors for brand companies previously limited to more expensive and bulkier packaging solutions.
- Jabil Packaging Solutions end-to-end packaging solutions combine innovative consumable packages with consumer device manufacturing, giving brands the speed and power to build new and loyal relationships with their customers.
- Jabil Packaging Solutions is on the leading edge of Smart Packaging technology, offering cost effective solutions for IoT-enabled packages that drive revenue, margins and brand differentiation.
- Through its \$18 billion, Fortune 200 parent, Jabil Packaging Solutions offers world-class technical, design and electronics capabilities, Supply Chain analytics and risk mitigation, as well as unprecedented buying power.
- Jabil Packaging Solutions leverages digital prototyping, 3D print and modular tooling to ensure speed-to-market gains that have the power to cut NPI time in half.
