

## OVERCOME CHALLENGES

### YOU HAVE A FIXED MODEL FOR YOUR ROBOTICS PRODUCTION

The robotics industry is **CHANGING RAPIDLY**, for high value added applications

Production has been perfected and is steady, but new features have been introduced creating **NEW DESIGN CHALLENGES**

Seize new business opportunities by incorporating advanced Robotics features

Increase your market relevance by adding new features

Increase your brand reputation by creating innovative Robotics solutions

Reduce your manufacturing costs by optimizing your design for industrialization and manufacturing

## Jabil SOLUTIONS

- Enter the IoT space with complementary capabilities such as Sensors, Wireless, and Automation
- Evolve your robotic product to enter the Internet of Things space by updating your product to sense, process and make 'intelligent'
- Ensure highest quality with complementary capabilities such as Sensors, Wireless,
- Ensure your internal robotics design functions efficiently by optimizing your design for industrialization and manufacturing

## INDUSTRY TRENDS

- ✓ New technologies are changing the way products are being manufactured
- ✓ Environmental impact. Focusing on material sources, waste, recycling, and product cycles
- ✓ Increase focus on visual appeal in addition to function
- ✓ Automation is creating cheaper labor solutions and more precise application
