As manufacturing technologies continue to improve and become more precise, the demand for consistent quality in manufactured products has paved the way for more advanced innovations. For decades, CNC machinery has been used in advanced manufacturing processes—their effectiveness only limited by their cutting tools. Jabil Cutting Tools offers advanced CNC cutter solutions by specializing in the development of carbide cutting tools for precision cutting in many key markets.

Our journey started more than 10 years ago. With humble beginnings fuelled by our desire to fulfil our in-house needs, we started building our own cutters. As a user of our own products, our initial success in designing and building precision tools grew into a mission for quality, deepening our experience with precision tool making. Today, we are confident that we can bring you unparalleled expertise and value. Equipped with multiple sets of precision grinding machines and state-of-the-art measurement equipment, our tools are proven to be more reliable and longer lasting than many in the market.
Jabil CNC Cutter Solutions

Equipped with more than 50 precision grinding machines and high-tech measurement machines, Jabil Cutting Tools is dedicated to supplying high performance ratio cutters to customers worldwide. We offer design, manufacturing solutions and sales of mold cutters, aluminum, stainless-steel and other hard metal cutters with precision from 20 millimeters to 0.1 millimeters. Jabil Cutting Tools are competitively priced and tested to be longer lasting than our competitors.

Our tool studio has designed hundreds of cutters. This in-house capability allows us to provide advisory and customized design support.

A Proactive Solutions Partner

In a constantly changing manufacturing world, our technical knowledge and deep experience in diverse industries allows us the vantage point to partner you in developing innovative cutting tools and solutions to help transform your business.

Expect:
• Innovative and customized designs optimized for performance and manufacturability
• Rapid prototype for accelerated product introductions
• High quality products and components combined with the latest automation and process technologies

Machining Materials
• Mold Steel
• Stainless steel
• Aluminum
• Titanium
• Plastic and Composites

Cutter Types
• Standard
• Radius, Micro, and Square
• Form
• Drill

System Control
• Design Navigate System
• Mold Production Management System
• Mold Enterprise Resource Planning

Certificates and Registrations
• ISO14001
• OHSAS18001
• ISO50001

About Jabil

Jabil is a manufacturing solutions provider that delivers comprehensive design, manufacturing, supply chain and product management services. Jabil’s unique combination of global expertise, ingenuity, analytics and financial performance has contributed to the success of the world’s most well-known brands. We employ more than 200,000 employees across more than 100 sites strategically located around the world.
