

DEVICE SOLUTIONS SUITE

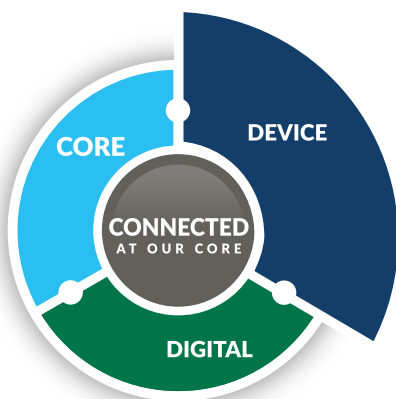

JABIL PACKAGING SOLUTIONS
LEVERAGES ITS EXTENSIVE ELECTRONICS EXPERIENCE TO DELIVER SUPERIOR DEVICE AND CONSUMABLE PACKAGING SOLUTIONS.

Brands and retailers face a rapidly changing, omni-channel marketplace where more creative ways to package products are needed to attract consumers. They need value-add packaging that enables them to gain and retain customers.

They need to create automated packaging that delivers what is produced in bulk, but served in single portions. They need personalization. To enable an easier, more enjoyable consumer experience. To be more accessible. They need to create an angle for their brands that will enable them to stand out on store shelves and online.

Jabil Packaging Solutions offers multiple solutions to connecting a device with a consumable for the end-user. By working through one point of contact in our Device Solutions Suite, our customers can access best-in-class electronics manufacturing, design, value-add engineering and supply chain services.

As part of one of the largest contract manufacturers in the world, we are a trusted partner that can create brand essence that will motivate consumers to buy.

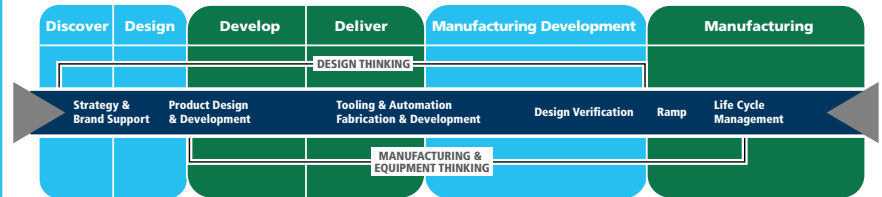

By creating packaging that makes consumers' lives easier, we help brands and retailers reconnect to consumers in ways that build life long customer loyalty. Our customers create packaging through us they just can't get done internally—or through smaller suppliers. Our expertise in packaging, devices and electronics services enables our customers to re-establish relationships they lost when consumers directed buying habits through other outlets.

SINGLE SOURCE INTEGRATOR

Jabil Packaging Solutions is a single source integrator brands and retailers rely upon to develop and deliver consumer and professional devices. Deep expertise in electromechanical design and IOT technology is paired with robust plastic and electronic assembly capabilities to deliver superior device solutions.

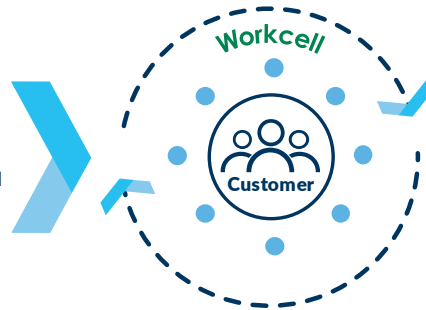

Ideation, design, development, manufacturing and delivery are all managed through a single source, reducing complexity and improving time-to-market.

Reducing Complexity and Improving Speed to Market

Dedicated Workcells augment our customer's resources and expertise with a unique set of Empowered Experts, Technology, and Operational Excellence

- Innovation Acceleration
- Engineering Excellence
- Manufacturing Agility
- Supply Chain Orchestration

A TRUSTED SET OF HANDS

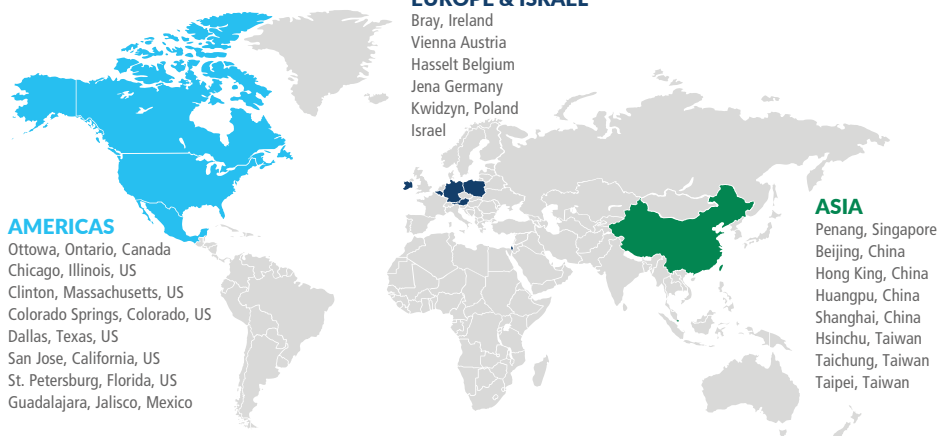

We are connecting the evolving worlds of electronic manufacturing services and packaging, driving device innovation for brands and retailers. Taking the best of what exists today and making it better by creating platform solutions through our unmatched design capabilities, value-add engineering, manufacturing footprint and supply chain capabilities.

Diverse sensor bundles, deep plastic and electromechanical assembly capabilities and a storied history of PCBA fabrication help reduce Device risk for our customers.

FILLING A KNOWLEDGE GAP

We proactively bring ideas to customers that promote the development of device-consumable product combinations. We have the knowledge and expertise our customers need to integrate electronics and plastics while adding sensors and software for improved product experiences and enhanced customer intimacy.

Access to 1,500 Global Engineers
