

J322-S

High Performance, Low Latency, 4th Gen Intel® Xeon Dual Socket 2U Rackmount Server

Tackle your most demanding fintech needs with a purpose-built server platform offering NVMe, SAS, and SATA hot pluggable storage and customizable high speed, low-latency I/O options. This 2U dual socket server brings you flexibility, scalability, and reliable performance to support time sensitive applications in the financial services industry.

REMARKABLE PERFORMANCE

Featuring low latency, high speed PCIe Gen5, DDR5 memory and CXL 1.1, 4th Gen Intel Xeon processing power, and flexible storage capacity, this server maximizes datacenter performance and efficiency for both general workloads and fintech applications.

- 4th Generation Intel® Xeon® Scalable processor microarchitecture offers superb power efficiency, data integrity protection, and proven reliability for evolving customer expectations. This means better response time for more applications running simultaneously with increased total performance.
- Supports the latest high performance smartNICs, and FPGA accelerators at PCIe Gen5 speed without retimers or expanders in the I/O path for the lowest latency possible.
- NVMe PCIe Gen5 and SAS 4 (24G) SSD options offering high-speed, reduced latency and increased IOPs to unlock the full performance capabilities of today's processors.
- Intel® VROC NVMe RAID and Hardware RAID options available.

VERSATILE EXPANDABILITY

The J322-S is a highly configurable server providing many different configurations of network adapters, accelerators, NVMe, SAS, or SATA SSD drive slots to expand with your needs, and offers:

- Up to 24x small form factor (SFF) front SSD drives
- 2x internal M.2 NVMe slots
- 6x PCIe Gen5 add-in card slots and an OCP 3.0 PCIe Gen5 slot allows for a wide array of network, accelerator, and storage controller connectivity into the server to fit a wide array of fintech workload needs.
- Configured to order with Xilinx® XtremeScale™ ethernet adapters, Alveo™ data center accelerators, and Napatech SmartNICs.

FEATURES

- Scalable for high-performance, low-latency workloads, or cost savings
- Increased memory capacity and speed
- Power redundancy for failure free operation
- Security options safeguarding platform integrity
- Customizable BIOS & application optimization tuning
- Toolless chassis
- Hot pluggable NVMe/SAS/SATA SSD drives
- Improved performance with Gen5 PCIe/ NVMe and CLX1.1
- Redfish API support
- Network adapter and accelerator options
