

Companion App

A Branded Consumer Application to Manage Product Auto-Replenishments

Connected Packaging provides an exciting solution to many of the challenges that the world's largest CPGs currently face. Jabil's connected packaging solution combines three key elements: the durable device, the consumable package and the companion app.

The Jabil Connected Packaging Companion App transforms the consumer packaged goods experience by connecting devices to consumers and to the IoT back-end that facilitates seamless reordering of household staples.

When connected to the device, the Companion App notifies consumers when product is running low. Consumers can then approve or delay the replenishment, ensuring that they never run out of product, yet also ensuring that they never have an excess. Convenient. Fast. Easy. No need to prepare grocery lists, manage subscriptions or store items in bulk.

Jabil's Companion App provides multiple customization options to facilitate your branding without the headache of designing, developing and maintaining a bespoke mobile application. Jabil supports the application, constantly testing to ensure reliability, scalability, security and privacy. The clean and simple interface is easy to navigate for end-consumers of all ages and levels of technical ability.

COMPANION APP BENEFITS

- Faster Time-to-Market
- Intuitive UI/UX
- Reliable & Scalable
- Robust & Secure Architecture

COMPANION APP FEATURES

- WiFi & Bluetooth® Connectivity
- Access to Order History
- Branding Customization
- Real-Time Order Status Notifications
- Reorder Threshold Customization
- Bring-Your-Own-Bin Calibration
- Monitor Product Usage

COMPANION APP TECHNICAL SPECIFICATIONS

- EOS-s102 Encryption
- Match Privacy Policies
- X5 iOS Certified
- Constant Background Testing
- Identity Service & Cloud Agnostic

HOW IT WORKS

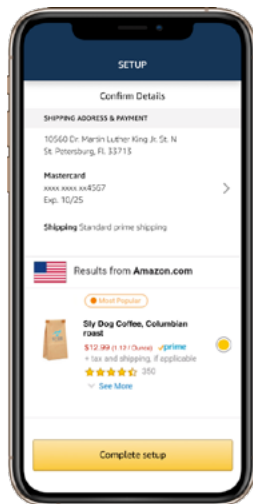

1. Upon download completion, consumers are met with the brand splash screen

2. The companion app and Cyclops pair via Bluetooth technology and connect to the consumer's home WiFi network

3. The consumer then names and calibrates their device by selecting its size

4. The consumer selects the desired products on the retailer setup page

5. When product level falls below the reorder threshold, the consumer is notified that new product is on the way

ABOUT JABIL PACKAGING SOLUTIONS

Jabil Packaging Solutions, headquartered in St. Petersburg, Florida, enables food and beverage, home, personal and professional brands to create differentiated products in areas including intelligent, active, rigid and sustainable packaging, as well as consumer devices. Purposeful innovation, advanced conversion capabilities and best-in-class manufacturing practices are just some of the drivers that enable use to co-develop game-changing rigid packaging for our customers.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Jabil Inc. is under license. Other trademarks and trade names are those of their respective owners.
